

INTERNSHIP VISION TECHNOLOGY

JUNE 2023

Introduction to the Company

- Our work is not only about writing code but to create great experiences for our customers.
- We aggregate data, people and processes in a coherent vision.
- We integrate software and innovation to build great experiences for our customers.
- We are the agile technology partner for large companies on their digital path.

History

2010

We established Vision
Company in Bucharest as an
IT Solutions and Services
Provider.

Our main goal was to provide high level IT services for multinational companies

2011-2013

New colleagues joined our team widening our services delivery capabilities

We opened the Development Center in Pitesti

Our strategy towards developing talents was started through creating partnership with Romanian Universities

2014-2016

We successfully delivered complex projects for Travel and Financial Industry

Based on existing experience, our focus turned to Vision Products and Solutions consolidation strategy

2017

Business restructuring in 3 directions: Technology Development, Solutions and Cloud

Our main focus was to embed all our previous disparate experience in specific products and solutions

2019

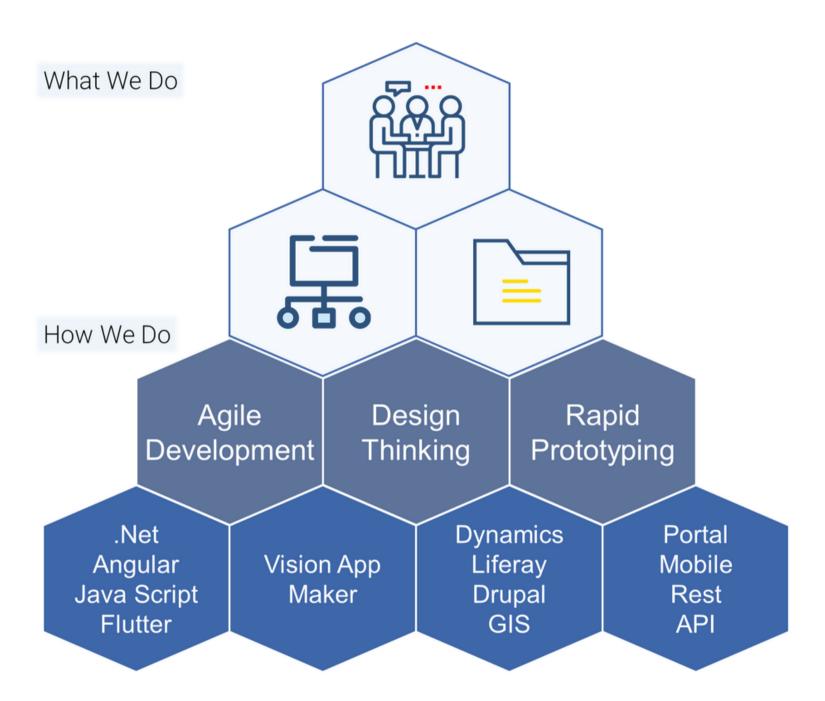

Vision Solutions reached high maturity becoming easy to customize COTS products

We consolidate our cloud services division

Our focus was to leverage our expertise with our products and solutions to deliver digitalization for important customers

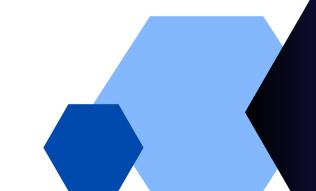

How we work

- We integrate software and innovation to build great experiences for our customers.
- We are the agile technology partner for large companies on their digital path.
- We incorporated in our internal methodologies powerful approaches like Design Thinking and Agile Prototyping.
- We created a software development framework, Vision App Maker, enabling our projects team to successfully deliver great experiences for our customers.
- We use modern and appropriate technologies for each component purpose: reliable back-end developed in Microsoft .NET and flexible, responsive and rich front-end based on Java Script and Angular.
- Our approach is to re-use existing software components, a key factor when it comes to increasing productivity and improving the quality of software.

Technologies

Vision App Maker **Vision Development** Framework Build complex applications in visual designer, without code.

Vision IoT

IoT Components

Improve efficiency in Lighting, Agriculture, Transportation, etc. with IoT integrated systems. Vision GIS

Integrated GIS Platform

Create, edit, visualize, analyze and publish geospatial information in direct correlation with all your business data.

Organizational Chart

Open Positions:

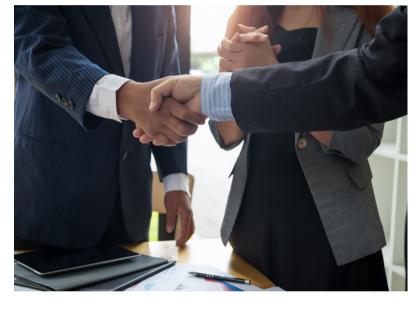

What is an internship @ Vision Technology

An internship program within our organization can mean both a successful start in your career, a great way to gain practical experience, the chance to meet professionals in the field and the opportunity to be part of an excellent working environment with friendly colleagues.

Step 1

Let's get to know each other!

 Hi! Now that you know who we are, we want to know all about you, your passions, your projects and expectations

Step 2

Join our Team! Join our Vision!

 you will have an assigned person that will provide all the information's about the projects, about ways of working and interaction within the team

Step 3

Let's press START!

 On July we press START on our project together! Get ready for some exciting times!

Next Steps

Calendar and Key Dates

Candidate selection

March April - May June July
