

Job Title: **Infrastructure & DevOps Engineer**

Contact: daniel.matea@vision.ro

Company: **Vision Technology Development**

Location: **Bucharest**

Industry: IT&C

Job Type: **Full Time**

Reports to: Operations Manager

Job Level: **Junior, Intermediate**

Our mission is to develop the specific knowledge, the right approach, and the proper software tools to increase our customer's advantage in digitalization and automation partnerships.

We aggregate data, people, and processes in a coherent vision, reinventing the workplace with AI, automation, and Internet of Things.

We support organizations to digitalize their assets, operational processes, and customer services so they can exploit the digital and physical connections between systems, people, places and things.

We are looking for an organized colleague to handle the Support & DevOps activities as well as Vision Infrastructure.

Job Description:

- Manage the build and release processes across multiple environments and infrastructure
- Being the first point of contact for customers seeking technical assistance over the phone or email;
- Qualifying and documenting the problems raised by customers;
- Monitoring company internal infrastructure

Skills and Competencies:

- Understanding infrastructure architecture and design (Windows, HyperV, Security, IIS, Apache)
- Basic networking knowledge
- Ability to manage multiple projects and relationships simultaneously

This role is a 1st /2nd Line Support Engineer and can also be known as a Helpdesk Engineer, Technical Engineer, or DevOps Engineer.
